

Season Suite Sports Academy

Module 3 Cheat Sheet: Customizing Your First Season Suite Sports Template

Module Goal

Customize your template with your team's photos, colors, text, and logo while maintaining a polished, professional design.

Step-by-Step Workflow

- **Add your player photo.** If you don't have Canva Pro, remove the background first using the free Adobe Background Remover, then upload the image into Canva.
- Use the **Style** paintbrush to copy the existing photo style.
- If needed, use **Edit** → **Adjustments** to fine-tune brightness, contrast, or other settings. Every photo is different. (A full Adjustments lesson is included elsewhere in the Academy.)
- Update your team colors.
- Replace the placeholder text with your team's information.
- Add your team logo.
- Review everything before downloading or sharing.

Coach's Tip

Follow the same editing order every time: Photo → Style → Adjustments → Colors → Text → Logo. You'll work faster and your graphics will stay consistent.

Common Mistakes to Avoid

- Uploading photos before removing the background.
- Editing your master template instead of a working copy.
- Skipping photo adjustments when needed.
- Forgetting to replace placeholder text or logos.
