

Season Suite Sports Academy

Module 4 Cheat Sheet: Mastering the Layers Panel in Canva

Module Goal

Use Canva's Layers panel to quickly find, select, and rearrange elements in your Season Suite Sports templates.

Quick Checklist

- Open the Layers panel.
- Select hidden or hard-to-click elements.
- Move layers up or down.
- Use Bring to Front and Send to Back.
- Fix covered elements by adjusting layer order.
- Review your finished layout before downloading.

Coach's Tip

If something isn't behaving the way you expect, check the Layers panel before starting over. Most editing issues are simply layer-order problems.

Common Mistakes to Avoid

- Trying to click covered elements directly.
- Moving the wrong layer.
- Forgetting to check the stacking order after adding photos.
- Rebuilding a design instead of adjusting the layers.
